

COMPANY PROFILE

ArchiNova Engineering

Architecture, interior
and exterior design

UAE / GCC

SPACES WITH PURPOSE

Considered layouts.
A distinct identity.
Details that belong.

Architecture begins with how we live.

ArchiNova Engineering is an emerging UAE-based design practice focused on architectural concepts, interior design and exterior spaces for homes and businesses.

We translate a client's ideas into a coherent design direction, connecting layout, materials, lighting and detail. Each project starts with the people who use the space and the purpose it needs to serve.

RESIDENTIAL / COMMERCIAL

OUR POINT OF VIEW

Thoughtful spaces.
Clear decisions.

VISION

To become a trusted design partner for architecture and interior design that bring lasting value to everyday life.

MISSION

To develop clear, carefully considered concepts through open communication and attention to function, aesthetics and budget priorities.

From the first idea to a defined design.

01

Architectural concepts

Concept layouts, space planning and building form studies, considering circulation, daylight and indoor-outdoor connections.

02

Interior design

Furniture layouts, material palettes, colour schemes, ceiling concepts and lighting intent for residential and commercial spaces.

03

Exterior design

Facade concepts, entrances, proportions and finish selections that establish a consistent architectural character.

04

Outdoor spaces

Concepts for gardens, terraces, courtyards and seating areas, with attention to shade, privacy and movement.

05

3D visualization

Three-dimensional views to communicate layouts, finishes and atmosphere, supporting informed design decisions.

06

Shop drawings

Shop drawings, design drawings, mood boards and presentation packages developed to the agreed scope.

Each proposal defines the deliverables, drawing detail, revision allowance and schedule. Specialist engineering, statutory submissions and construction services are addressed separately where required.

Warmth. Texture. Light.

A visual language shaped by warm neutrals, natural textures and considered lighting. Contemporary interior design and classical architectural influences provide a starting point for each client's own direction.

UNIQUE OPTIC / INTERIOR DESIGN

Display design, customer spaces and material details.

Proportion. Material. Detail.

A cohesive architectural character, from the entrance composition to the facade details.

ENTRANCE COMPOSITION

Classical influences expressed through balanced forms and carefully considered finishes.

FACADE MATERIALS & LIGHTING

Your Private Escape, Beautifully Designed.

Poolside seating, planting and an open kitchen connected through a unified material palette.

POOLSIDE LOUNGE

OPEN KITCHEN & SOCIAL SPACE

Designed for the working day.

Open workstations and clear circulation create a connected workplace. Arched glazing brings in daylight, while a dark exposed ceiling and linear lighting give the space a contemporary character.

Warm materials. A clear identity.

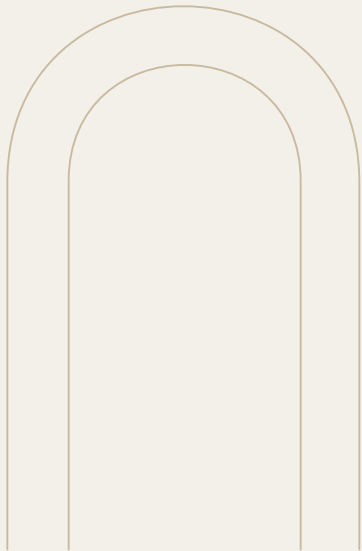

Timber finishes, neutral tones and planting soften the industrial ceiling. Integrated storage, a feature map wall and lounge seating balance everyday practicality with a welcoming atmosphere.

WORKSPACE / LOUNGE / MATERIAL DETAILS

A clear path through design.

An agreed scope. Defined review stages.
A design direction you can understand.

01 Understand

Your objectives, preferred style, available plans and budget priorities form the brief.

02 Explore

Layouts, visual references and material ideas establish a direction for your feedback.

03 Refine

Agreed drawings and visualizations develop the selected concept through defined review stages.

04 Present

The design package brings the agreed information together for review and coordination with your project partners.

Let's shape your next space.

Share your project location, approximate area, preferred style and target timeline. Plans, site photographs and reference images help us understand your requirements.
